ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: CONNECTING ROD APPARATUS & METHOD

(57) Abstract: An improved two-piece connecting rod (800) that connects a reciprocating piston with a crankshaft in an internal combustion engine. The connecting rod (800) has a shank portion (810, 860), a cap portion (820, 870) and projections (830, 880, 882) extending from one or both of the shank (810, 860) and cap portions (820, 870). When the shank (810, 860) and the cap (820, 870) are connected, the projections (830, 880, 882) mate with the opposite side with an interference fit, thereby resisting relative motion between the shank (810, 860) and the cap (820, 870) along the split-line (A').
